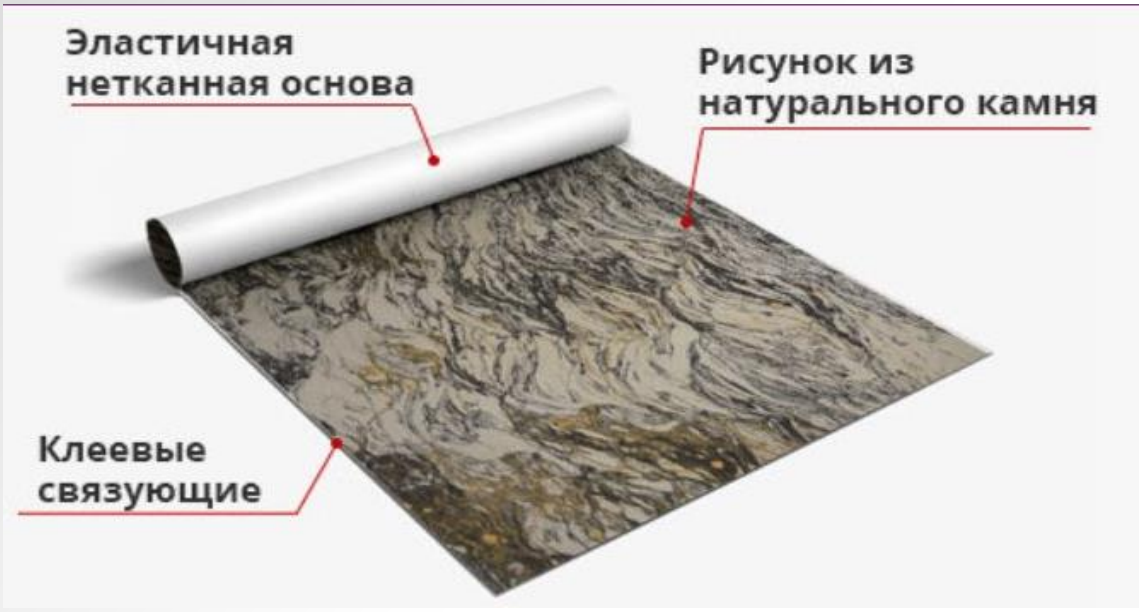
Что такое гибкий камень?

Гибкий камень - это качественный строительно-отделочный материал, имеющий все необходимые сертификаты. Его можно применять как во внутренней, так и во внешней отделке.

Применяется:

на стенах комнат, в ванных комнатах, бассейнах, на каминах, кухонных фартуках, фасадах, беседках и т.д.



Плюсы материала:

- Весит в 10 раз меньше натурального камня.
- Большие размеры рулонов 2,84 на 1,42 м и 3 на 1,42 м.
- Возможность оформления сложных и полукруглых архитектурных форм.
- Высококачественное и экологичное сырье.
- Эксплуатационный срок до 30 лет.
- Изготовление практически любого цвета и оттенка.
- Нанесение УФ-печати и изготовление уникальных картин и фресок.
- Использование в температурном диапазоне от -50 до +150 С.

Виды гибкого камня и мрамора:

Гибкий камень серии «Песчаник»

«Гибкий мрамор»

Гибкий камень серии «Монотон»

- Размер 1,42 * 2,84 м, 1,42 * 3 м, толщина 2-4 мм.
- Вес рулона 7-8 кг.
- Монтируется на клей для внутренней или внешней отделки (клей производим).
- Рисунок и цвет на выбор заказчика.
- Рекомендуется финишное покрытие акриловым лаком (лак производим).

Делаем **МРАМОР НА ЗАКАЗ** (любые рисунки мрамора не из каталога) размером 1,42*2,84 м, рисунок и цвет на выбор заказчика.
